

Start Producing Advanced Cleaning and Disinfecting Solutions On-Site

"R-Water is going to revolutionize healthcare. There are always new products coming and going, but R-Water is different. I tell everyone about it. The solutions produced by R-Water's device to clean and disinfect perform outstandingly. As we overhaul procedures in this hospital I am so glad we are implementing the use of TK60 and FC+ in all of our protocols.

Not only do they perform exceptionally well, we are also reducing worker and patient exposure to chemicals, including eliminating chemical irritants in the air that would linger for hours. This is especially crucial for those patients with allergies and asthma. With TK60 and FC+, there are no irritants; nothing in the solutions that would harm patients, the janitorial staff, nurses, or doctors."

GARY LOFTIN, CHFM

Director - Integrated Facilities Management
HHS/Cuero Regional Hospital

Tested & Approved by The Agencies You Trust

DISINFECT FASTER

Hospital-grade disinfectant kills 100% of Staph/MRSA and 99.9997% of *C. diff* 10 times faster than harsh chemicals.

MORE EFFECTIVE WITHOUT SACRIFICING HEALTH

Nontoxic, non-carcinogenic solutions will not harm humans, animals, or the environment.

IMPROVE INDOOR AIR QUALITY

Eliminate VOCs and allergens by replacing a variety of harsh chemicals with fragrance-free solutions.

REDUCE ENVIRONMENTAL IMPACT

Producing nontoxic solutions on-site reduces truck deliveries and toxic landfill waste.

PREVENT SLIPS AND FALLS

Quick-drying, residue-free formulation eliminates the risk of slips and falls, and does not require rinsing after use.

PROTECT WATER RESOURCES

No rinse, no residue solutions save time, money, and our precious water resources.

IMPROVE EFFICIENCY

Multi-use solutions reduce training, labor costs, and the need for invoicing and receiving chemicals.

REDUCE FREQUENCY OF REMODELS

Protect your FF&E with solutions that will not damage, discolor, or fade surfaces.

Sustainable and Effective

The TC-RU replaces common wall-mounted chemical mixers. Using only pure salt, water, and electricity, TK60 and FC+ are conveniently generated on site, ready to use (RTU).

1) ADD PURE SALT TO THE EASY FILL PORT

2.7 lbs of salt yields approximately 1,000 gallons of solution.

2) POSITION BOTTLES, BUCKETS & EQUIPMENT UNDER DESIRED DISPENSER

Rapid flow dispensers have a three gallon per minute flow rate, with convenient hose attachments for filling large buckets and equipment.

3) PRESS BUTTON TO DISPENSE SOLUTION

Both of the solutions are produced and dispensed "Ready to Use" (RTU) - no diluting or mixing!

Solutions Engineered to Work as Hard As You Do

TK60 TOTAL KILL SIXTY SECONDS ONE-STEP DISINFECTANT

Replaces disinfectants, disinfecting wipes, sanitizers, deodorizers, window cleaners, and more.

- Kills harmful bacteria and viruses 10 times faster than old chemicals.
- Eliminates VOCs that cause irritation, allergies, and asthma.
- Is safe to use on electronics and food contact surfaces.

TK60 EFFICACY TEST RESULTS

Pathogen	Efficacy (% Kill)	Contact Time
Staph/MRSA	100%	60 seconds
Pseudomonas	100%	60 seconds
C. diff	99.9997%	60 seconds
Influenza A	99.9%	60 seconds
Listeria	99.9997%	30 seconds
E. coli	99.995%	60 seconds
Norovirus	99.82%	60 seconds
Black Mold	99.54%	60 seconds

Contact time - the minimum amount of time a surface must remain thoroughly wet to achieve efficacy claim.

DID YOU KNOW THAT MOST DISINFECTANTS HAVE A 10 MINUTE CONTACT TIME?

FC+ FLOOR & CARPET PLUS ALL-PURPOSE CLEANER

Replaces multi-surface cleaners, carpet cleaners, floor cleaners, grout cleaners, degreasers, and more.

- Removes grease, dirt, and residues left behind by old chemicals.
- Use in auto-scrubbers, carpet cleaning equipment, and more.
- Reduces the risk of slips and falls.
